Personal Profile

Recently graduated Computer Science and Mathematics student based in London with a strong analytical background. Seeking a graduate role to utilise and cultivate my skills in software development and data analysis. Driven by my passion for problem-solving and continuous learning, I am eager to apply my knowledge in a professional environment.

Skills

- **Languages:** Python, Java, C++, R
- **Frameworks**: Flask, HTML, CSS
- **Libraries:** Scikit, Matplotlib, NumPy, Pandas
- **Developer tools**: VS Code, RStudio, QT

Experience

July 2023 – August 2023   **Assistant Leader - RoboThink**

- Intuitively developed an Excel-based registration substitute using custom expressions during a system transition period.
- Organised and hosted various workshops and events.
- Demonstrated leadership and academic knowledge to mentor young individuals.
- Methodically arranged and managed the branch's products and stock.

June 2022 – September 2022   **General Porter/Operations Team - Berjaya Eden Hotel Park**

- Communicated with housekeeping and reception teams via telecoms to monitor room status and coordinate the clearing of available rooms.
- Proactive in managing renovations and logistics for the opening of a new branch.
- Effectively coordinated and oversaw the inventory management of linen stocks.

Education

September 2021 – June 2024   **Nottingham Trent University**
BSc (Hons) Computer Science and Mathematics

- Computer Science modules cover Software Design, AI & Machine Learning and Data Analysis.
- Mathematics modules include Advanced Calculus, Numerical Analysis and Statistics.

Extra-Curricular

Manchester Great Uni Hack 2023
Attended the Great Uni Hack in Manchester in 2023, where I coded a project within a 24-hour time constraint. The project involved applying machine learning skills to identify and alert users to the presence of event staff, allowing participants to sleep and bypass the no-sleep restriction.

Python Social Media Bot
Utilised Python and the Discord module to create a custom server bot capable of allowing users to play games such as Rock Paper Scissors and Ultimate Tic Tac Toe. Additionally, it provides basic server commands and moderation.
